tailBeaconX

Simplify airspace mandates by meeting them all with the transponder of the future.

tailBeaconX replaces your existing transponder and upgrades your rear position light. Unimaginative panel-mount transponders and ugly antennas are a thing of the past with tailBeaconX.

Starting at **\$2499***

*tailBeaconX requires a control head to set the mode and squawk

WHAT'S INSIDE

- Mode S Transponder
- 1090 ES ADS-B OUT
- Integrated WAAS GPS
- Compliant above FL180
- Ground and Space-based ADS-B

tailBeaconX

Control Head Options

Pair tailBeaconX with any of our multi-function panel displays to configure tailBeaconX's Squawk and Mode.

tailBeaconX is also compatible with many existing EFIS' such as GRT and MGL.
