

Cutting-Edge Technology Without Any Cutting

AV-30 is a digital precision attitude and directional gyro display that fits in your existing 3" panel slot seamlessly. By mounting from behind, it preserves the "steam gauge" look while upgrading to a customizable digital EFIS and eliminating the need for cutting or replacing your panel. Installing two AV-30-C units allows the removal of failure-prone vacuum systems.

DISPLAY VIEWS

- Primary Attitude **VFR/IFR STC**
- Primary Direction Indication **VFR/IFR STC**
- Primary Slip **VFR/IFR STC**
- Probeless Angle of Attack
