

COMPATIBLE

TSO CERTIFIED

# tailBeaconX

The only **Mode S Transponder with 1090 ADS-B Out** that replaces your aircraft's taillight

## GLOBAL AIRSPACE READY

tailBeaconX is FAA TSO Certified and meets the U.S., Canada, Australia, New Zealand, Brazil, and other ADS-B performance requirements.

## ALL-IN-ONE TRANSPONDER

tailBeaconX is **your transponder** with integrated ground and space-based ADS-B antennas and WAAS GPS built-in to the LED light enclosure.

## LOW-COST, EASY INSTALL

tailBeaconX installs with a simple wire run from the tail to your panel. Free up valuable panel space and eliminate your aging transponder/encoder with tailBeaconX.

## REDEFINING THE TRANSPONDER

# Transponder Control. Attitude. Direction. And More.

Set tailBeaconX's Squawk, Mode, and ALT with the AV-30 or AV-20 panel displays. Plus, with AV-30-C, get a Certified Primary Attitude Indicator and Directional Gyro with over 12 supplemental safety-enhancing features including AOA, Vertical Speed, Airspeed, G-meter and more.

## SAVE WHEN YOU PURCHASE TAILBEACONX WITH A DISPLAY

AV-30 + tailBeaconX	3-inch Primary AI/DG EFIS	STC   EXP	Save \$200
AV-20-E + tailBeaconX	2-inch Multi-Function Display	EXP ONLY	Save \$100

uAvionix.com

\* tailBeaconX requires AV-30-C, AV-30-E, AV-20-E, or a supported 3rd-party EFIS or display to set Squawk, IDENT, and select Mode.
