

### Overview

ping200X is a TSO-C112e Mode-S transponder with TSO-C166b Extended Squitter for operating an Unmanned Aircraft (UA) in controlled airspace.

The system replies to Mode A, Mode C, and Mode S interrogations and squitters 1090MHz ADS-B messages, all in accordance with RTCA performance standards. Together, they provide ATC and nearby aircraft equipped with a TCAS or ADS-B receiver full knowledge of the UA's 3-D whereabouts. Heightened situational awareness leads to timely maneuvering, adequate separation, and enhanced airspace safety that benefits everyone.

Also integrated into ping200X is a TSO-C88b pressure altitude sensor and encoder.
